

## **GUIDELINES FOR NEW OR EXISTING INTERNSHIPS March-June 2020 MSc in ECONOMICS AND DATA ANALYSIS**

(For university guidelines, please refer to <https://en.unibg.it/node/7817>, section Internships:  
“What will change, how it will work”)

**The Internships will be rescheduled by September 2020, in the meanwhile these rules apply:**

### **1. Curriculum “Economics and Data Analysis”:**

If you are a student that has already started an internship with a minimum of 70% of the total number of hours the internship can be considered completed.

For all the other students, let me recall that the internship is not compulsory. However, it can be planned as on distance project if the partner agrees upon.

### **2. Curriculum EMOS**

- For the students who have already agreed upon the title of the project and the supervisor with ISTAT, the internship will be managed on distance learning and it will be recorded by September. This entitles the students to get all the ECTS related to the internship activity included in the programme.
- For the *students* who have not yet been able to identify a project or/and a supervisor with ISTAT, due to the current emergency situation, we would reschedule the procedure by September 2020. In the meantime, informal arrangements about the possible titles and Istat tutors for the future internship are investigated. This will be useful to be ready to start in September.
- For the *first-year* students we will plan the internships (for the year 2021) from the next September.
