

## Master Degree Program in Economics and Data Analysis (EDA)

In the courses of the EDA program we teach students the main statistics, econometrics and machine learning methods for data analysis and visualization. But what data analysts really do out there in the job market? What is needed to be sure that our data really rock? Let's meet who really works with data every day (and some of them are former Unibg students!).

05<sup>th</sup> May 2021, 2:30pm - 4:30pm

On-line event: [Microsoft Teams link](#)
